## Vocabulary Review

# Recognize Vocabulary

Match the term on the left with its description on the right by writing the letter of the description in the blank next to the term.

- |                              |                                                                                                 |
|------------------------------|-------------------------------------------------------------------------------------------------|
| _____ 1. matter              | <b>A</b> the state of matter that has no definite shape or volume                               |
| _____ 2. solid               | <b>B</b> the pull of gravity on matter                                                          |
| _____ 3. liquid              | <b>C</b> changing from a gas to a liquid                                                        |
| _____ 4. physical properties | <b>D</b> the amount of matter in an object                                                      |
| _____ 5. gas                 | <b>E</b> the ability of a substance to dissolve                                                 |
| _____ 6. mass                | <b>F</b> the changing of a liquid to a gas                                                      |
| _____ 7. evaporation         | <b>G</b> the ability of a substance to react chemically                                         |
| _____ 8. weight              | <b>H</b> the characteristics of a substance that can be measured without changing the substance |
| _____ 9. condensation        | <b>I</b> mass per unit of volume                                                                |
| _____ 10. volume             | <b>J</b> the state of matter with a definite shape and volume                                   |
| _____ 11. reactivity         | <b>K</b> the ability to burn                                                                    |
| _____ 12. density            | <b>L</b> anything that has mass and occupies space                                              |
| _____ 13. combustibility     | <b>M</b> the amount of space anything occupies                                                  |
| _____ 14. solubility         | <b>N</b> the state of matter with a definite volume but no definite shape                       |
