

Should go again

fun time learning outside of the classroom

fun and educational - learn about sea animals

and play on the playground

Educational because people there teach you

about sea life and ecosystems. It's fun for the kids

so they don't even know they are learning

It's educational. Learn about sea life and

ecosystems so they can teach others.

Educational and learn about sea life/ecosystems/water

It's a fun way of learning and it helps inform them

Students get to learn about sea creatures and adaptations

It's exciting and students get to touch sharks and other things they wouldn't normally get to do

Should not go again

The field trip should focus on ALL units instead of just ecosystems

The boat is dangerous - not enough life jackets

Instead of wasting time learning about ecosystems again, they could learn about something new

Why go on a field trip that could end badly (dangerous)

The field trip should focus on more things they learned so there would be more reinforcement

Students shouldn't have to wake up so early. They don't have as much energy or brainpower when they wake up so early.
