

FOR THESE: Write two possible equations, Do banker/boss (with parent if possible!) and then try the standard algorithm for long division.

Boss you have 6 employees.

Banker give the boss 7 tens, 4 ones, and $\frac{7}{10}$ ths of a dollar

Equations:

Boss you have 7 employees

Banker give the boss 8 tens, 5 ones, $\frac{5}{10}$ ths of a dollar, and $\frac{4}{100}$ ths of a dollar

Equations:
