

$$\frac{3}{4} \times 8$$

$$\frac{3}{4} \times 12$$

$$\frac{4}{10} \times 4$$

$$\frac{2}{2} \times 6$$

Explain:

What does $\frac{1}{2} \times \frac{1}{2}$ MEAN? What is the meaning of this equation? What is the answer? Why is that the answer?
